PROFILE

I develop web applications, admin dashboards, and SaaS products primarily with React and Next.js. Although my work is frontend-focused, I also have experience developing backend services and data layers with Node.js, PHP, REST APIs, PostgreSQL, MongoDB, Prisma ORM, and Sequelize ORM.

I have worked on software development, product analysis, and testing for QR menu, technical service tracking, POS, restaurant management, and Digital Signage products. My technical installation and user support experience has also enabled me to help identify field requirements, clarify software requirements, and test developed features under real-world operating conditions.

WORK EXPERIENCE

MaPos Business Solutions

Feb 2026 - Jul 2026 | Istanbul

Product and Technical Operations Specialist

- Performed product analysis, functional testing, installation, and user support for MaPos restaurant management software.
- Reviewed requests from customers and field teams and contributed to defining software requirements.
- Conducted functional tests, reported defects, and followed up on fixes.
- Contributed to the end-to-end development of the Digital Signage software.
- Worked on device pairing, content management, playlists, scheduling, and remote device control features.
- Installed and configured POS devices, thermal printers, mobile applications, and network components.
- Trained business users and supported pre-sales product demonstrations and post-sales technical support.

Independent Software Developer

Aug 2025 - Jan 2026

SaaS Products

MenuRevo | menurevo.com

Developed a QR menu SaaS product for restaurants and cafes using Next.js, Node.js, PostgreSQL, Prisma ORM, shadcn/ui, and Tailwind CSS.

- Built the business dashboard, admin dashboard, and mobile menu interface accessed through QR codes.
- Developed menu, category, product, price, portion, image, and language management screens.
- Implemented QR code generation, PDF export, ready-made menu templates, and mobile-responsive menu display.
- Built multi-tenant architecture, user authorization, and administration workflows.
- Developed backend services and database operations with Node.js, PostgreSQL, and Prisma ORM.

Techsimum | techsimum.com

Developed a cloud-based service management SaaS product for small and medium-sized technical service businesses using Next.js, Node.js, PostgreSQL, Prisma ORM, shadcn/ui, and Tailwind CSS.

- Built screens for tracking device intake, fault records, repair status, payments, and delivery processes.
- Developed create, update, and view workflows for customer, device, and service records.
- Implemented features for managing service records and informing customers about process status.
- Built user authorization, business management, and record tracking functionality.
- Developed backend services and database operations with Node.js, PostgreSQL, and Prisma ORM.

Aspower

Jun 2024 - Jul 2025

Full Stack Developer

- Developed a CMS admin panel using Next.js, shadcn/ui, Tailwind CSS, PostgreSQL, and Prisma ORM.
- Built Digital Signage screen management software with React, Material UI, Node.js, and Sequelize ORM.
- Contributed to rewriting an Angular-based EV charging operator panel in React.
- Developed a MongoDB-based diagnostic panel for monitoring electric vehicle charging station status.
- Built a PySide6 desktop log analysis tool for inspecting OCPP records.

Beranet Software

Feb 2023 - Jul 2023

Full Stack Developer

- Developed corporate websites with admin panels using PHP, jQuery, Bootstrap, and Tailwind CSS.
- Worked on user interface, backend, and database development.
- Built administration screens for content management and data entry.

SaveAs Software

Jun 2020 - Feb 2022

Frontend Developer

- Contributed to the development of istanbultarihi.ist.
- Worked on user interface and content development.
- Assisted with server installation, configuration, and maintenance.
- Performed database backups and routine checks.
- Installed and configured the development tools used by the team on the server.

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, JavaScript, jQuery, Tailwind CSS, Bootstrap, Material UI, shadcn/ui

Backend and APIs: Node.js, PHP, REST APIs

Databases and ORM: PostgreSQL, MongoDB, Prisma ORM, Sequelize ORM

Desktop and Protocols: PySide6, OCPP log analysis

Development Tools and Systems: Git, GitHub, GitLab, Docker, Linux, Ubuntu, Debian

Product and Domain Experience: SaaS products, admin dashboards, POS and restaurant management systems, Digital Signage, QR menus, technical service tracking software, product analysis, functional software testing, technical installation, and user training

AI-Assisted Development Tools: Cursor, Claude Code, ChatGPT
